

## The Secret of Joomla-Creat Sitemap without installing additional extensions

HariesDesign.com Secret of Joomla, you can have a sitemap in your Joomla site without installing any additional extensions. follow this step to learn.

### Step 1

Create a new article called 'Sitemap'. In the body, type {loadposition sitemap} and save it.

### Step 2

Make a new menu item called Sitemap, and point it to the article.

### Step 3

In the module manager, make a new Menu module. Set 'Menu name' to the menu you want to display as a sitemap.

### Step 4

In the position box, type 'Sitemap'. Obviously this refers to the position we used earlier in the {loadposition...} tag

### Step 5

Make sure you set 'Always show submenu items' and 'Expand menu' to yes, and save.

### Step 6

Add more modules for each menu

### Step 7

You should now have a nice sitemap in the frontend. You can style it with CSS or if you're creative, you can add some folding using javascript.

### Step 8

Post a link here to your sitemap, to show the world what you did

Done!
