

PHPId Mod List (Free)

- Social Bookmarks :: Download :: Demo 1 :: Demo 2

- Social Bookmarking Links to Your Detail Pages

- PHPId PR update tool :: Download :: Screenshot

- A phpLinkDirectory modification that allows one to update the page rank of all links in ones link database. You can select many or just a few links you would like to update. You can also reset the tracking to update the links at any later date.

- Supported phpLinkDirectory versions: V2.10, V2.12, V3.10, V3.20

- Latest Featured Links :: Download :: Demo

- A very simple mod which allows you to display a list of the latest featured links which have been submitted to the directory. The mod will display the number of featured links as defined under the administration setting "Links on top pages;" under Settings > Directory.

- Developed and tested with phpLD v3.1.0 and v3.2.0

- Homepage Newsfeed :: Download :: Demo

- Allows

you to display a newsfeed on the homepage of your directory to increase the content. Tested on all of the popular feeds such as Yahoo, BBC, ABC News, etc. The mod is very straight forward to install and configure, you can use any feed you wish and decide how many headlines should be displayed.

- Developed and tested with phpLD v3.2.0

- Most Popular Categories :: Download :: Demo

- Displays

a linked list of the top 10 visited categories within your directory. The template can be customized to suit your directory and positioning of the top 10 list. The mod works with both rewrite enabled URL's and normal URL's as defined in your configuration.

- Developed and tested with phpLD v3.0.6, v3.1.0 and v3.2.0

- Random Quotes :: Download

- This

little addition to your site will allow you to display a random quote every time a page is requested. This is a highly effective method of introducing fresh content for the search engines, especially when operating a niche directory.

- Developed and tested with phpLD v3.2.0

-Site of the Day :: Download :: Demo

- Allows

you to display a "Site of the Day" on any of the pages you choose. The web site is randomly selected from the database; with each day loading a new site. An example of this mod in action can be seen on our homepage. This mod is very straight-forward and easy to install, just download the zip file and follow the install.txt contained within.

- Developed and tested with phpLD v3.0.6, v3.1.0 and v3.2.0

-Split Category Links :: Download

- Split up the category links on your details page and increase your internal linking structure. Normally if a user submits to the category "Business » Investing » Other", the details page will display a single link back to that category. Install this mod and instead, your details page will generate a link for each sub category. One for "Business » Investing » Other", one for "Business » Investing", and one for "Business";!

- Developed and tested with phpLD v3.1.0 and v3.2.0
